

Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A razor blade holder adapted to attach to structure at a site in order to provide blade storage and accessibility, comprising:

a receptacle sized to hold at least one razor blade and to keep ~~exposed and~~ accessible at least a portion of an upper edge thereof, said receptacle including:

a back panel adapted to be attached to said structure.

2. (original) A razor blade holder according to claim 1 wherein said receptacle is tilted to allow the razor blade to freely project away from said back panel.

3. (original) A razor blade holder according to claim 1 wherein said receptacle has a downwardly converging opening for receiving the razor blade.

4. (original) A razor blade holder according to claim 3 wherein the at least one razor blade comprises a plurality of razor blades each having a cutting edge, the opening of said receptacle having a bottom shaped and sized to closely and adjacently

3

fit the cutting edge of the plurality of razor blades.

5. (original) A razor blade holder according to claim 1 wherein the opening of said receptacle contains a forward face and an opposing, parallel rear face.

6. (original) A razor blade holder according to claim 1 wherein the opening of said receptacle has a forward face and an opposing rear face, said holder comprising:
a shelf extending back from the opening of said receptacle to establish clearance
for finger access behind the opening of said receptacle.

7. (original) A razor blade holder according to claim 6 wherein said rear face of the opening is marked with a reminder message.

8. (original) A razor blade holder according to claim 6 wherein said rear face reaches higher than said front face.

9. (original) A razor blade holder according to claim 1 wherein said back panel has an adhesive backing.

10. (original) A razor blade holder according to claim 1 wherein said back panel has an upper plurality of fastening holes.

4

11. (original) A razor blade holder according to claim 1 wherein said receptacle has an opening, said back panel extending to a higher elevation than said opening.

12. (original) A razor blade holder according to claim 11 wherein said back panel is marked with a commercial message.

13. (original) A razor blade holder according to claim 1 wherein said receptacle comprises:

a hollow body; and

a front wall connected to said hollow body, said front wall upwardly and outwardly extending in front of said hollow body.

14. (original) A razor blade holder according to claim 13 wherein said hollow body has an overhanging face slanted to overhang said front wall.

15. (original) A razor blade holder according to claim 13 wherein said hollow body has a parallelepiped cavity.

16. (original) A razor blade holder according to claim 15 wherein said parallelepiped cavity is open and sized to hold spare razor blades.

17. (original) A razor blade holder according to claim 1 wherein said receptacle

comprises:

a front wall and an opposite rear wall, said back panel being attached to, spaced from, and extending behind said rear wall for clipping said receptacle to said structure.

18. (original) A razor blade holder according to claim 17 wherein said back panel has an upright portion extending to a higher elevation than said rear wall.

a¹¹
19. (currently amended) A razor blade holder adapted to attach to structure at a site in order to provide blade storage and accessibility, comprising:

a receptacle sized to hold at least one razor blade and to keep ~~exposed and~~ accessible at least a portion of an upper edge thereof, said receptacle having a downwardly converging opening with a forward face and a higher rear face for receiving the razor blade, said receptacle being tilted to allow the razor blade to freely project outwardly, the rear face of the opening being marked with a reminder message; and

a shelf extending back from the opening of said receptacle to establish clearance for finger access behind the opening of said receptacle. said receptacle including:

an adhesively backed back panel connected to said shelf and adapted to be attached to said structure, said back panel extending to a higher elevation than said opening, said back panel being marked in front with a commercial message.
